

CONSTRUCTION - ELECTRICAL

MOST CITED STANDARDS FOR CONSTRUCTION - ELECTRICAL JANUARY 1, 2001 TO DECEMBER 31, 2001

RANK	STANDARDS CITED		NUMBER
1	1910.147(c)	When an employee was exposed to contact with parts of fixed electrical equipment or circuits which have been de-energized, the circuits energizing the parts were not locked out or tagged out according to the requirements of this section.	8
2	1926.300	General requirements for hand and power operated tools were not met.	4
3	1926.250(a)	Storage of materials created a hazard. All materials stored were not stacked, racked, blocked, interlocked, or otherwise secured to prevent sliding, falling, or collapse. Maximum safe load limits of floors within buildings and structures were not conspicuously posted in all storage areas.	3
3	1926.403	General and installation requirements for electrical equipment and installations used to provide electric power and light at the worksite were not met. Electrical equipment was not free from recognized hazards that were likely to cause death or serious physical harm to employees.	3
